At
South East Manipur College, Komlathabi
Manipur - 795135

on
14th - 16th Nov. 2016

Sponsored by
University Grants Commission
NERO, Guwahati

ANNOUNCEMENT

Organised by
Department of Environmental Sciences
South East Manipur College, Komlathabi

ABOUT THE COLLEGE

The College was the first established College in Chandel District, Manipur in 1981 by the people of Komlathabi and its surrounding villagers with a vision to promote quality and excellence in Higher Education enabling the students in building a prosperous, harmonious, self-sufficient and sustainable society. The College was affiliated to Manipur University in 1983, was granted permanent affiliation in 1992 and was accredited by NAAC, Bangalore with B-grade in 2016. The College has offered courses in both Arts and Science streams upto Degree level and was recognized by University Grants Commission in 1994 under section 2(f) and 12(b) of the UGC Act 1956. The College offers B.A. and B.Sc. courses with general and honours in 19 subjects. B.Voc. degree course was also opened from 2014 in Information & IT Services and Food Processing & Engineering under UGC - New Delhi Scheme. Hostel facilities for boys and girls are available outside the campus. The College is vibrant with activities and is entering a phase of transformation and growth.

HOW TO REACH COLLEGE

The venue of the Seminar is at South East Manipur College, Komlathabi, Chandel, Manipur. The College is located in a multi-ethnic area and is about 48 kms. from Imphal, the capital city of Manipur along the NH No. 39. Imphal is well connected by Air with metropolitan cities of the country by daily flight. It is connected by Luxury Deluxe Buses from Guwahati and Silchar (Assam) by N.H. 53 and from Dimapur (Nagaland) by N.H. No. 39 and the venue can be reached by roadways.

ABOUT THE SEMINAR

It is well known fact that while air can be accounted for globally, water is national. Next to air, water is the most important constituent of life support system. Moreover, water is an important natural resource which is used for irrigation, industry, domestic needs and for sanitation and disposal of waste. Concerning living beings, most of our water bodies - ponds, lakes, streams, rivers, sea, ocean have become polluted due to human development programs viz. industrial growth, irrigation and other man-made problems.

Normally tribes were facing the problems of scarcity of water, source of water pollution, the seminar therefore aims at studying the cases of region specific with special reference to the source, storage, transport, conservation etc. indispensably associative to natural resource, water the tribal inhabitant district is limited to some extent and worst to the dwellers among the foot hills and pockets in abandon area of hill slopes.

AIM OF THE SEMINAR

The aim of the seminar is to educate the people about the preciousness of water, the elixir of life, to strengthen the concept of the people about water and to minimize the exploitation by determining the problems facing by villagers/inhabitants through participatory performance.

THEME OF THE SEMINAR

Water, a priceless wealth - Perceive, Utilize and Conserve it.
