## ONE DAY FIELD TRIP, HORTICULTURE STUDENTS

24<sup>th</sup> July, 2018

A one day field trip of Horticulture was organized by SEMCO on 24<sup>th</sup> July, 2018. Twenty five students out of the total thirty leave for the site along with their teacher, Mr. Jackson, a Horticulturalist and some staff of the College at 11 am. The first stop was made at Chandrapokpi:

The area of the site was owned by Mr. Samuel Chothe, 2 acres filled with banana, lemon and all sorts of fruits and poultry and vegetables. The teacher after recapping his previous explanation on the concerned, once again practically demonstrated thoroughly on the subject, the varieties of banana, how to cultivate, how to cut & transplant etc to the students for half an hour. The students were quite jubilant over the sessions. From there, the team headed for another banana plantation field across the Maha River, climbing the hills for about 30 minutes on foot. On the spot, the students raise queries on various topics related to horticulture in general and banana in particular. As it was raining heavily, the team could not venture further for fear of flood that was likely to occur if delayed longer. And as such the team rewind back to the College reaching the campus at 2.30 pm. After attendance, the students rested for some time, have refreshment and departed for their home. Number of participants including some teachers are 30 in total
